

CO₂ Suppression Systems

Architect and Engineering Specifications

APPLICATION

Instructional signs are provided to inform personnel of any potential hazards they face when operating certain devices or working within areas protected by CO₂ systems. All signs are made from a fire retar-

dant velvet finish Lexan™ and have white letters on a scratch proof red background. All signs have an adhesive backing for mounting purposes.

WARNING

ACTUATION OF THIS DEVICE WILL
CAUSE CARBON DIOXIDE
TO DISCHARGE.

BEFORE ACTUATING, BE SURE
ALL PERSONNEL ARE CLEAR
OF THIS AREA.

DESCRIPTION

This warning sign is used to warn personnel that the solenoid actuator is connected to a CO₂ system and that operation of the manual lever will cause the CO₂ system to discharge. This sign should be posted in the immediate area around the solenoid actuator where it can be easily seen.

SPECIFICATIONS

Part No: C70-1032
Size: 14" wide x 10" high
(35.6 cm) x (25.4 cm)

CAUTION

CARBON DIOXIDE FIRE
EXTINGUISHING SYSTEM
DISCHARGE INTO A NEARBY
SPACE MAY COLLECT HERE.

WHEN ALARM OPERATES,
VACATE IMMEDIATELY.

DESCRIPTION

This caution sign informs personnel that occupy an area near the CO₂ protected area that a potential hazard exists when the CO₂ system for the adjacent area is discharged. This sign should be posted inside the affected area where it will be readily seen by all persons occupying the area.

SPECIFICATIONS

Part No: C70-1034
Size: 14" wide x 10" high
(35.6 cm) x (25.4 cm)

September, 1999
Revised Issue

WARNING

AREA PROTECTED BY
CARBON DIOXIDE GAS
EXTINGUISHING SYSTEM.

WHEN ALARM OPERATES,
VACATE IMMEDIATELY.

DESCRIPTION

This warning sign is used to inform all persons occupying the protected area that a CO₂ system is in place and that they should evacuate the area when the alarm sounds. This sign should be posted in readily apparent locations throughout the hazard area where it can be seen by all persons working in the area.

SPECIFICATIONS

Part No: C70-1035
Size: 14" wide x 10" high
(35.6 cm) x (25.4 cm)

WARNING

CARBON DIOXIDE GAS
WHEN ALARM OPERATES
DO NOT ENTER UNTIL
AREA IS VENTILATED

DESCRIPTION

This warning sign is used to inform all persons entering the protected area that a CO₂ system is in place and that they should not enter the area if the CO₂ system has been activated until it is safe to do so. This sign should be posted at all entrances to the protected area.

SPECIFICATIONS

Part No: C70-1081
Size: 14" wide x 10" high
(35.6 cm) x (25.4 cm)
