

Segmentally-welded and specialty fabrication products are available in stainless and carbon steel, as well as painted or galvanized.

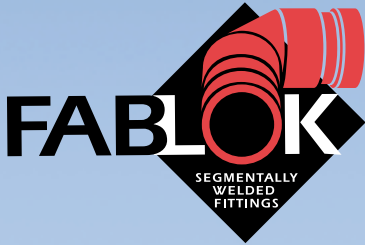

FITTING YOUR NEEDS AT EVERY TURN

Allied Tube and Conduit started manufacturing tube and pipe products in 1959. As leaders in the forefront of the industry, Allied developed cost-effective, high performance products for the electrical, fencing, mechanical and fire protection markets. In continuing with this tradition, FABLOK® segmentally welded fittings, manufactured at the Harvey, Illinois facility, have become part of the product line's success. We deliver what you have come to expect: fittings manufactured according to the highest standards with only the finest materials.
