

**Total Fire Protection is Our Passion  
Leading the Way Since 1970**

## System Manager App

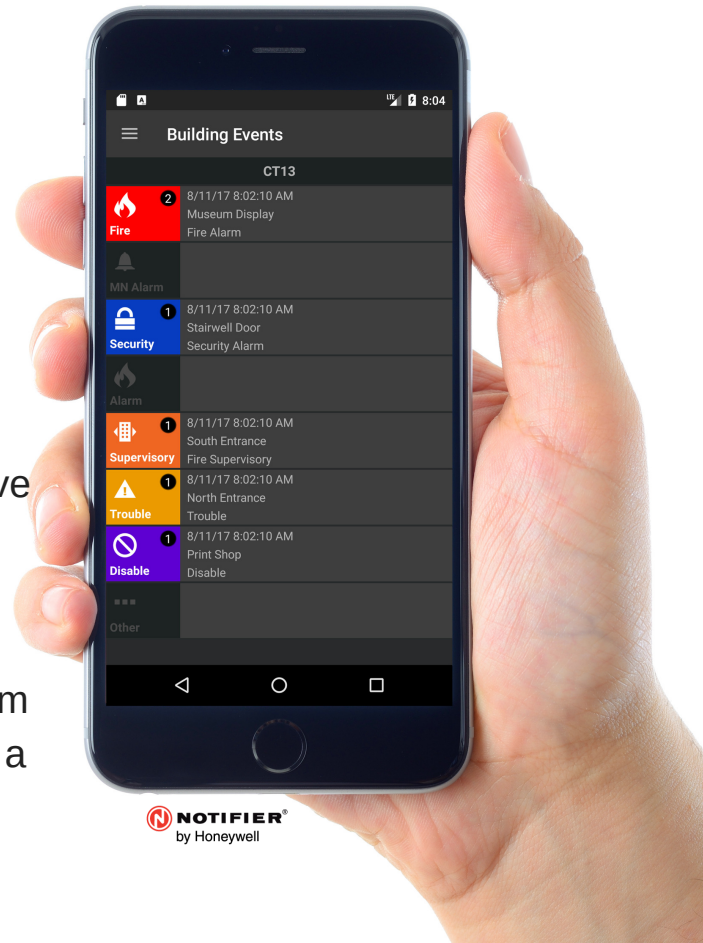

**View Your Fire Alarm System Status In Real Time**

Check the status of your addressable Notifier fire alarm system anytime, anywhere you have cell service or WiFi.

View event status, event history, device properties, and other information in real time. Forward to others via text/email.

Facility staff and building personnel receive push notifications of emergency and maintenance events.

The System Manager App receives system events from the NOTI-FIRE-NET through a web-based portal and is compatible with iPhone and Android devices.

Contact us for a demo or more information on how to access your fire system information through NOTIFIER's System Manager App.

**We are your single source provider that can meet all of your fire protection and life safety needs.**
