

# TO BETTER SERVE OUR CUSTOMERS & COMMUNITY, BFPE NOW PROVIDES HANDS ON TRAINING FOR TOTAL FIRE PROTECTION SYSTEMS

IN OUR YORK, PA BRANCH

As the leader in Total Fire Protection, BFPE International provides the ultimate training experience of all types of fire protection systems to our BFPE technicians, customers, community and AHJ representatives. Our York branch now offers classroom training and hands on training, by appointment, using fully functional fire protection systems. Our modern training facility has the latest fire protection technology.

PLEASE SEE DETAILS ON REVERSE SIDE.

# TEST, RESET, REPEAT...

**You, too, can experience the same test and inspection services our technicians provide.**

- Conduct a NFPA inspection on our Wet, Dry, Pre-Action, and Deluge fire sprinkler system training station. See how the water flows, the internal workings of a fire pump and controller, and how the devices interact with the Fire Alarm Panel. Test, reset, repeat...
- Experience how initiating devices, like Smoke Detectors, Heat Detectors, Duct Detectors, and Pull Stations, communicate with one of the many fire alarm panels on-site. Learn how to silence your panel and put it on test. Test, reset, repeat...
- Perform a NFPA inspection on our Clean Agent Systems, including a CO<sub>2</sub> Suppression System. Test how the releasing panel connects with the building fire alarm panel. Test, reset, repeat...
- You can't do this in your kitchen, but you can in ours with no mess! Activate a Commercial Kitchen Suppression System using compressed air. Compare systems and see how they connect to our fire alarm panels. Test, reset, repeat...
- We also offer hands-on fire extinguisher classes. Learn PASS and extinguish a live fire. Burn, extinguish, repeat...

We provide customized training based upon your particular needs. With proper training and knowledge, we can work together to make our lives better, safer, and more enjoyable.

BFPE International is a Total Fire Protection Company. Since 1970, we have been providing sales, installation, service, inspection, testing, and engineering services for all types of fire protection systems to all types of organizations. We are a 100% woman-owned company.
